Profile

Data Specialist and Web Developer with more than 2 years hand-on experience, creating solutions data-based and scalable apps. Experience in the BPO sector managing cross-functional BI projects, automation, and process improvement using Python, SQL, Power BI, and Databricks. Solid knowledge of Agile methodologies, deployments, and API development with Django.

Skills

- Project Management:** Requirements gathering and agile project execution with SCRUM.
- Data Transformation & Visualization:** Skilled in Power BI, Excel, and Databricks for analysis, and Matplotlib/Seaborn for custom visualization.
- Programming & Development:** Full-stack development using Python, SQL, JavaScript, and frameworks including Django, Laravel, Node.js, React, and RESTful APIs.

Experience

- Data Specialist - English**
Teleperformance - Amazon Ads 2025 - Present
As a Data Specialist, I design and automate end-to-end data workflows using Python, SQL, and Databricks to streamline ETL processes, reducing manual reporting time by 60%. I extend this automation by building integrated solutions with Power Automate and Google Apps Scripts, connecting disparate systems and eliminating manual data entry. This holistic approach ensures data accuracy, provides stakeholders with timely insights, and has contributed to a 30% reduction in cloud resource costs.
- Desarrollador Python - Django Freelance**
Software 2025 - Present
Develop and deploy a Django/React web application on AWS, enabling clients to access their orders 42% faster and doubling concurrent user capacity. This was achieved through optimized data models and efficient RESTful APIs, following agile methodologies for the final product delivery.
- Business Intelligence Analyst - English**
Teleperformance - Uber 2024- 2025
Led BI projects that delivered key insights, resulting in a 25% improvement in critical management KPIs. Automated reporting processes using Python, SQL, and Power BI, reducing manual effort by 65%.
